

Blood, Bones and Body Bits

Summer Term
Year 6

Did you know...?

Your mouth produces about one litre of saliva each day!

Your brain is sometimes more active when you're asleep than when you're awake.

Laid end to end, an adult's blood vessels could circle Earth's equator four times!

The word "muscle" comes meaning from Latin term 'little

mouse', which is what Ancient Romans thought flexed bicep

muscles resembled. You lose about 4kg of skin cells every year!

Bodies give off a tiny amount of light that's too weak for the eye to see.

The average person—has 67 different species of bacteria in their belly button.

Some of the questions we hope to answer this term are...

How does the human heart work?

How long can the body survive for without food or water?

How do we cope with change?

How do artists express their views?

What makes a good performance?

STONE AGE TO IRON AGE

This term, in History we will be learning about the earliest settlements; hypothesising how Stone Henge was built; and identifying the changes to houses, tools and lifestyles, during the Stone Age, Bronze Age and Iron Age, and comparing them to today.

In each subject, we will be learning...

In English, we will be studying 'Pig Heart Boy' by Malorie Blackman and will write persuasive texts and one-side arguments.

In science we will be learning about the human body, life cycles and puberty.

In PE lessons we will be learning tennis and cricket skills, as well as developing skills across a variety of athletic disciplines.

Art lessons will focus on Pablo Picasso and creating self-portraits.

We will also focus on transitioning to secondary school.

Join in with the learning at home...

Why don't you watch...?

- BBC Bitesize videos and quiz-
<https://www.bbc.com/bitesize/topics/zcyycdm>

Why don't you try...?

- Making a model of a human skeleton or organ
 - Keeping a fitness diary

Why don't you read...?

- Non-fiction books relating to the human body.
 - The Human Body – Horrible Science
 - BBC Science Website –Human Body:
